

Pro Ag is now offering a continuing tub card!

Buy 10 tubs and receive a \$50.00 credit towards the 11<sup>th</sup> tub.

## Featured Products

### Rangeland 38-20 Hi E

The Rangeland Hi E tub is a high protein and energy tub designed to be fed to cattle consuming fair to medium quality forage. The Hi E tub has modest levels of fat for additional energy during winter stress and elevated 3<sup>rd</sup> trimester requirements. Cattle will typically consume .5 to 1.5# per head per day. If your cattle need additional condition in the coming months this is the tub for you.

### Rangeland 17 Natural

Rangeland 17N is another available option for supplementing additional protein to your cattle. The 17N is a 17% protein all natural tub. Cattle will typically consume .5-1.0# per head daily. This tub provides optimum levels of minerals when consumed at 1# feeding rate.

### Rangeland Mineral Tub

The Rangeland Mineral tub is a complete mineral tub designed to provide your cattle with the mineral and vitamins they need. It provides optimum levels of trace minerals at a 6 oz feeding rate. Mineral intakes are very consistent when feeding with Rangeland tubs. RL tubs reduce waste and are a very convenient way to provide mineral to your cattle.

### Rangeland Stress Tub

Rangeland Stress tub is a highly fortified tub, which provides elevated levels of nutrients your cattle require in stressed situations or more demanding times such as calving and breeding. RL stress tubs comes with Zinpro's Availa-4, (complexed trace minerals Cu,Zn,Mn, & Co.) Diamond V Yeast as well as elevated levels of Vitamins A,D & E and a modest protein level. If you have sick or incoming calves this is the tub for you. Nearing calving, the stress tubs can help ensure your cattle get optimum levels of your most important nutrients.

All Rangeland tubs are low moisture cooked tubs, designed with only 3-4% moisture. Moisture from the air and saliva help loosen the top layer of tub to help control intakes as the lower portion remains solid. Free choice salt should be provided along with these tubs. Intakes can vary depending on quality & quantity of forages provided. If you have questions on which tub will fit into your operation contact your local Pro Ag dealer who have a beef consultant who can help balance your diets today!
